PROFESSIONAL SUMMARY

Java Developer and Full Stack Engineer with 8+ years of experience building microservices and REST APIs using Java, Spring Boot, and JPA. Strong background in legacy modernization, performance optimization, and working with Microsoft SQL Server and MongoDB. Experienced with AWS, CI/CD, Docker, Kafka, and React. Bilingual in English and Spanish.

CURRENT PROJECTS

Spring Boot Healthcare Microservices (Proof of Concept Portfolio)

- Built microservices using Spring Boot, JPA, Kafka, PostgreSQL, React, Docker, and AWS.
- Implemented REST APIs, CRUD operations, persistence, and CI/CD pipelines.
- Used Kafka for event-driven processing and Docker for containerization

EXPERIENCE

ResMed| ***Software Developer:*** *Sep 2012 - June 2020 | San Diego, CA*

- Part of a 5-person team that modernized EasyCare Online by migrating Patient List logic to an **asynchronous** Spring Boot microservice using a **non-relational database**, reducing database load and improving page load times.
- Owned and maintained the Patient List Service and ECX modules, delivering reliable REST APIs for internal systems.
- Designed and developed scalable Java services using Spring Boot, Hibernate, and RESTful APIs.
- Optimized SQL queries and database schemas, improving performance and reducing query load. Integrated Cucumber BDD tests into CI/CD pipelines and built Bamboo pipelines.
- Deployed services in AWS using S3 and mentored junior developers..

Qualcomm| ***Test Technician:*** *Feb 2012 - Sep 2012 | San Diego, CA*

- Performed diagnostics and functional testing on Qualcomm chipsets.
- Automated test workflows using Perl and generated performance reports.

EDUCATION

B.S. Electrical Engineering
San Diego State University | *September 2006 - December 2011*

TECHNICAL SKILLS

- Languages: Java, SQL, HTML, JSON
- Frameworks: Spring Boot, Spring MVC, Hibernate, JPA, React
- Databases: PostgreSQL, MySQL, Microsoft SQL Server, MongoDB
- Cloud & DevOps: AWS, Docker, Kubernetes, Kafka, Jenkins, Bamboo, GitHub Actions, CI/CD
- Testing & Tools: JUnit, Cucumber, Git, Maven, Linux
- Security: OAuth2, JWT
