PROFESSIONAL SUMMARY

Senior Software Engineer & SDET specializing in Java and Spring Boot with a B.S. in Electrical Engineering and 8+ years of enterprise experience in backend development, microservices, API design, and automated testing. Proven track record at ResMed modernizing legacy logic, automating test workflows, and delivering reliable backend services in FDA-regulated environments. English/Spanish.

TECHNICAL SKILLS

- **Languages & Frameworks:** Java (Java 8–21), Spring Boot 3, Spring Security, Spring Data JPA, Hibernate, React, TypeScript, JavaScript, SQL
- **Testing & Security:** JUnit 5, Mockito, MockMvc, Cucumber (BDD), RESTful APIs, JWT Authentication, Postman, Integration Testing
- **Databases & DevOps:** PostgreSQL, MySQL, MS SQL Server, MongoDB, Docker, Docker Compose, AWS (S3), Git, Maven, Linux, CI/CD

PROFESSIONAL EXPERIENCE

Independent Software Engineering Consultant | *July 2020 - Present* | *San Diego, CA*

- **Wayfare Platform Architecture:** Engineered a full-stack e-commerce and travel savings application using Java 21, Spring Boot 3, and React.
- Built full-stack RESTful microservice APIs utilizing a clean layered architecture (Controller, Service, Repository, DTOs).
- Secured endpoint authorization and user authentication using Spring Security and JWT for stateless session management.
- Designed and executed isolated unit and integration test suites using JUnit 5 and MockMvc to ensure high API reliability.
- Containerized local application environments and PostgreSQL database services using Docker Compose.

ResMed| ***Software Developer:*** *Sep 2012 - June 2020* | *San Diego, CA*

- Developed and validated Java-based microservices and RESTful APIs for connected medical device management in an FDA-regulated software environment.
- Modernized legacy Patient List logic by migrating to an asynchronous Spring Boot microservice, significantly reducing database query loads and improving system responsiveness.
- Integrated Cucumber BDD test frameworks and JUnit into Bamboo CI/CD pipelines to ensure automated quality assurance and reliable build releases.
- Authored clean, maintainable Object-Oriented Java code adhering to strict medical device engineering, quality, and documentation standards.
- Collaborated with cross-functional teams to optimize database schemas (SQL Server, MongoDB) and mitigate technical risks.

Qualcomm| ***Test Technician:*** *Feb 2012 - Sep 2012* | *San Diego, CA*

- Performed diagnostic and functional testing on Qualcomm chipsets, validating firmware across Windows, Android, and mobile platforms.
- Automated diagnostic test workflows and data collection using scripting tools, accelerating test reporting and bug tracking cycles.

EDUCATION: B.S. in Electrical Engineering | San Diego State University (SDSU), San Diego, CA
